

## **WEEK 2 INSTRUCTIONS-ALGEBRA**

Axis of Symmetry, Vertex, Etc Worksheet:

- I have included a sheet with AWESOME SAMPLES (I think) of all the materials we have been working on. The questions AND SOLUTIONS are there, with descriptions of how/why
- I HIGHLY SUGGEST you look at the samples sheet
- For the non-graph questions (2nd half of the sheet, I would get separate paper if I were you because there is not enough room for all that work)
- I will set up a Zoom Meeting to discuss it mid-week
- Be sure to do this before your Test

Quadratics Test:

- You must take a short video of yourself in front of your computer or whatever and show me the final score on the screen too
- THIS MAY BE YOUR LAST OPPORTUNITY TO BOOST THAT AVERAGE!!!! Take your time....!!
- You may use any method you wish: completing the square, factoring, quadratic formula or graphing (use your graphing calculator app or the virtual calculator I sent to you all on Remind or DESMOS)
